

Fashion your Portal according to your Corporate Design!

External Facing Portal Implementation

10.500,- € plus VAT

The challenge

You use the SAP NetWeaver Portal as stable intranet- or extranet platform in your company. Your marketing department wants all internal and external communication media to adapt the corporate design of your business. The identification of employees with the company and the acceptance of the platform by partners, customers, and your own employees should be improved and expanded.

Our services

Based on the HTML/CSS-files¹ provided by your design agency we will create the portal framework for the development system of your portal landscape. For a "proper portal" HTML-template implementation we consult and agree in advance with your design agency and define the do's and don'ts concerning the HTML-development based on our longstanding and extensive portal experience.

Your benefits

With the implementation of your company-specific design you have the opportunity to present a unified internal and external representation – implemented in accordance with your corporate design. You use the corporate portal to strengthen the message of your brand. A consistent visual appearance helps to clearly identify your company and brand – giving you a clear advantage over your competition which failed to recognize enterprise portals as a "Brand Billboard".

An attractive design also supports information acquisition by the individual user. This way you will succeed to gain new target groups and user circles in the long term.

SAP Special Expertise Partner:
SAP NetWeaver Application Server
SAP NetWeaver Process Integration
SAP Business Process Management
SAP NetWeaver IDM

¹ Optional: implementation of HTML/CSS-templates on request
