

Employee Self Services – Ready for Business

Employee Services at a Fixed Price 9,500 € plus VAT

Your advantages

- SAP standard technology
- Immediate return on investment
- Higher employee retention
- Relief for functional departments
- Low project costs

The challenge

Compared to other value-adding processes, today's HR processes have much longer runtimes than in the past. One of the main reasons for this are the frequent breaks in media that occur within the process. IT-supported activities are disrupted by paper-based operations. This results in repeated data entry and potentially compromised data quality.

Attending to employee needs represents a significant workload for the HR department, and often only covers day-to-day tasks (administering master data, retrieving and viewing data, creating data certificates, etc.). The disadvantage: Issues within the company that are truly relevant to HR take a back seat, or employee inquiries cannot be answered promptly.

Our services

We make SAP's Business Package for Employee Self Services available in your SAP NetWeaver-based employee portal. The interfaces (time tracking, etc.) are based on SAP standard technology and offer your employees central access points for regular HR-related activities. We work together with you to identify the scenarios that promise the most added value in your current situation and put your "top" scenario into action in your employee portal.

Your benefits

Using the HR processes specific to your company, we show you the possibilities and advantages of SAP Employee Self Services and implement the process of your choice. This shortens process runtimes, prevents breaks in media at the process interfaces and relieves your HR department. We place great emphasis on creating portal scenarios that are easy to use for your employees, even without any training.

We provide you with everything you need so that your employees can quickly and conveniently take care of their own HR-related needs without contacting the HR department, giving you more time to focus on your core tasks.

We are at your service with specialists and technologies that bring with them the technological expertise and required process knowledge. As part of the requirements analysis, we determine your needs and advise you in choosing the right process.

We offer you the following services:

Employee Self Services

- Collaborative analysis of the HR-relevant processes in your HR system and comparison of the SAP standard scenarios available.
- Joint coordination of the application scenarios to be mapped¹.
- Analysis and setup of your system infrastructure
 - Configuration of all required connections in your central System Landscape Directory (SLD)
 - Setup of SSO between the portal and back-end system within your system landscape
 - Configuration of WebDynpro connections
- Installation of the Business Packages corresponding to your system landscape plus patches.
- Collaborative design of the area group page and the area page.
- Implementation of the area group page and the area page using a coaching approach.
- Adaptation of your role structure in the SAP NetWeaver Portal for an optimized introduction
- Customization of portal and back-end for the jointly agreed scenario.
- Creation of all transport packages and support in transporting the search application into the productive environment.
- Documentation of all developments, configurations and settings.
- Project management for the life of the project.

Requirements

The processes to be mapped by ESS are already in productive use in your SAP back-end system. You provide the required infrastructure (ERP back-end and SAP NetWeaver Portal).

And you also ensure that our consultants have direct access to all administration tools for the back-end or portal, or access to these through designated employees.
